

# LUIS BETANCOURT

## FRONTEND DEVELOPER

I'm 26 years old, and I'm an addict. I'm addicted to coding, and I'm addicted to coffee. Both of these started with a line of code that said...

```
<h1>Hello, World!</h1>
```

My obsession has turned into a passion which I can use to better the world through digital solutions. At the tip of my fingers, I hold the ability to create stunning interfaces and enhance user experience.

## TECHNICAL SKILLS

- HTML
- CSS
- Javascript
- SASS
- Tailwind
- React
- Firebase
- Git

## SKILLS

- Self-taught
- Time management
- Problem-solving
- Quick learner
- Customer service

## FEATURED PROJECTS

### Expense Tracker [🔗](#)

- Designed and developed an expense tracker using React.js and Firebase.
- Was able to utilize firebase to create users, store their information, and display data to corresponding accounts.
- Experience with custom hooks, components, and working with a database.

### Microsoft Open Source Clone [🔗](#)

- I wanted to learn Tailwind, so I recreated Microsoft's site using Tailwind.
- Increase in production with this framework.
- Clean organized code.
- Fascinating workflow and adaptability.

### Shopify Landing Page [🔗](#)

- My first landing page after getting a good understanding of Javascript.
- Implementing the overlay feature with Javascript was the most challenging, but also the most rewarding.

## PAST EXPERIENCE

### Waiter - Pappasito's Cantina

August 2015 - September 2021

While learning to code I served as a waiter for over six years. In this position, I learned teamwork, communication, leadership, discipline, multi-tasking, and much more. I was expected to execute a high level of service to exceed the guest dining experience while working with colleagues to overcome various challenges. Additionally, I was in charge of training new servers to develop their skills.
